Reservation Policy & Terms of Sale

Deposits and Reservations

Reservations are taken in the order deposits are received. A fifty dollar deposit reserves a kid from the breeding of your choice. Should a kid of the desired sex from your reserved breeding be unavailable, your deposit may be applied to a kid from another breeding, refunded, or applied to a breeding the following year. Prices are firm once your deposit is received and will be honored in subsequent years until the kid that you reserved is available unless you have requested a refund of your deposit. Please note that prices may INCREASE if deposits aren't made based on performance or type testing results which may be earned before payment is received. Deposits will not be refunded if the kid reserved is available and full payment is not received within 6 weeks of notification of birth, at which time the kid will be offered for sale to others.

Pricing of Kids

We strive to breed high quality milk producing Nigerian Dwarf goats which can sustain this productivity with efficiency and longevity. As such, we believe in performance testing as well as linear appraisals to evaluate and document our success. As we all know quality comes at a price, and the value of the information gained from testing must be factored into our pricing.

In addition, all goats purchased will be current on vaccinations (CD/T), dewormed, disbudded, tattooed, and have their feet trimmed. You will receive a full health history, care instructions, as well as registration applications or registration transfer certificate (for does and bucks).

The starting price for a doe or a buck kid is \$400, while wethers can be purchased for \$100. When purchased with a buck or doe, wethers are priced at \$60. Quantity pricing on wethers 6 months of age or less exclusively are \$150 for two, or three for \$200. Wethers over 6 months of age are currently selling for \$3/pound on the hoof. Rebates are offered to encourage and subsidize our customers' involvement in performance and/or type testing of RHV progeny (does and bucks). We will refund (per animal) \$25 for a one-day milk star or \$50 for 305 day DHIR milk testing (including owner supervisor) (star or AR merit is not required for 305 day testing refund, however 8 tests are required). In addition, \$25 (per animal) will be refunded for participation in a linear appraisal (excluding young stock program). This constitutes a maximum of \$75 per animal refunded upon our receipt of the test results.

Weaned Goats

A deposit of 50% of the total price for a weaned goat will hold the animal for you. The balance is due within 30 days and/or prior to leaving our farm. Beginning 30 days after receipt of your deposit, boarding charges of \$2.00/day will begin to accrue and must be paid prior to the goat leaving our farm. If the goat is not paid for in full within 4 weeks of deposit receipt, all monies received for the goat shall be forfeit and the goat may be offered for sale to others. If a goat is not picked up within 60 days after

deposit receipt, all monies paid toward such goat shall be forfeit and the goat may be offered for sale to others.

Shipping & Health Certificates

Arrangements may be made to pick up kids from the farm or to have kids transported and/or shipped. All expenses for shipping, health certificates, requested testing and crates for transport are the responsibility of the buyer. We will transport to the St. Louis or Springfield airports for a fee of \$100 since either drive is 4 hours round trip for us. Airline expenses are an additional expense of the buyer. Alternatively, we may be able to transport to a meeting point within a 2 hour drive of our farm for a prorated fee based on travel time.

Kids must be paid for in full before leaving our farm. Transport arrangements must be made in a timely manner. A boarding fee of \$2.00 per day will be charged beginning 10 weeks after notification of birth unless other arrangements are made and approved prior to that time. All veterinary expenses incurred after the age of 10 weeks on a purchased kid will be the responsibility of the buyer in addition to daily boarding fees. All moneys paid towards a goat will be forfeited and the goat will be offered for sale to others if the goat is not picked up by 16 weeks of age (kid) or within 4 weeks of purchase for an adult goat. We will gladly work with you to arrange for your goat to be transferred to you in the best possible manner for the health of your goat. No goat will be held without a deposit.
